DETAILED ACTION

This Office Action is in response to the amendment filed November 24, 2009 for the above identified patent application.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1, 3, 5, 8, and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, the newly added limitation "said oil grooves..." lacks proper antecedent basis. Specifically, it is understood the sliding device is formed with only a single oil groove (claim 1, line 5).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. As understood, claims 1, 5, 8, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Mohsin (USP 4,457,566).

Mohsin illustrates in Figure 7 a sliding surface provided on a movable slide, which is guided on the slide guiding surface for movement thereon, and slidably movable on the slide guiding surface; an oil groove (32) with a first supply hole (46) for supplying lubrication oil to a contact surface area between the sliding surface and the slide guiding surface; an oil pocket (33) formed independently of the oil groove for retaining the lubrication oil supplied to the contact surface area between the sliding surface and the slide guiding surface; and air discharge means (48) for discharging air from the oil pocket.

Allowable Subject Matter

5. Claim 3 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
6. Claims 7, 9, 11, and 12 are allowed.

Response to Arguments

7. Applicant's arguments filed November 24, 2009 have been fully considered but they are not persuasive.

The argument that Figure 7 of Mohsin discloses a journal bearing and not a sliding guiding device is not persuasive. Specifically, it is understood the journal bearing is a sliding device for guiding a component in rotary motion. Accordingly,

this argument does not overcome the rejection based on Mohsin because a journal bearing is a sliding guiding device.

Further, the oil grooves of Mohsin are considered independently arranged in a sliding direction.

Since applicant arguments are not convincing, the claims stand rejected as described above.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
